

Freedom Series Controller

Rumblings Pride's Freedom Series Electronic Control Module (ECM) is the core of the Arsenal LED Lighting System. Feature rich, our ECM provides 100% remote controlled functionality that is unrivaled, and raises the bar when it comes to LED lighting effects.

- ✦ Controls the power, and the LED sequencing rotations and speeds.
- ✦ The ultra compact controller's all inclusive design allows for easy installation near the battery and includes a pre-wired, in-line fuse.
- ✦ The only hard wired connection required is positive (+) and negative (-) to the battery using pre-spaded wires, all other connections to the Arsenal LED Lighting system are Plug-N-Play.
- ✦ The Plug-N-Play interconnectivity between all Arsenal LED lighting products saves time on installation and provides for additional lighting to be easily added at anytime.
- ✦ Virtual limitless product installation, go from mild to wild.
- ✦ Full five-year manufacturer warranty.

Freedom III Controller

- ✦ LED illumination sequencing patterns include seven freeze modes, nine flash modes, a fade mode, and a strobe mode.
- ✦ All flashing/fading modes controllable at five variable speeds.
- ✦ Two auxiliary 12-volt outputs:
 - ✦ Remotely controls Rumblings Pride's 2-Pin LED Products as well as other aftermarket LED lighting systems.
 - ✦ Provides on/off functionality, plus flash and fade modes controllable at five variable speeds.

CONTROLLER MSRP: \$149.95

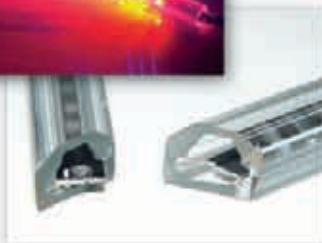

Stealth Tubes

Stealth tubes "disappear" providing an intense luminescent glow rather than "spotting" caused by pod style products. The tube profile is designed to dispel the light from the LED's in a prismatic manner, while the soft, flexible material allows it to match the contours of the motor-cycle offering multitudes of installation locations.

Stealth 6" Tubes

- ✦ Largest selection of colors and color combinations, a total of 19 different options for the ultimate in customization.
- ✦ Prismatic profile eliminates spotting creating an intense luminescent glow.
- ✦ The Plug-N-Play interconnectivity between all Arsenal LED lighting products saves time on installation and provides for additional lighting to be added.
- ✦ Available in 6" lengths, the soft, flexible tubes match the contours of the bike allowing for easy concealment.
- ✦ 6" tubes are designed with nine (9) LED's per tube and fit perfectly under gas tanks and oil pans, inside swingarms and fairings, and under tour packs, and for ground effects mounted under saddle bags and frame rails, just to name a few standard mounting locations.
- ✦ Sealed components provide both water and heat resistance.

STEALTH 6" TUBES MSRP: \$49.95 PR

6-Shooterz Accent Lighting

Rumbling Pride's accent lighting is designed to compliment Stealth tube installations. Our 6-Shooterz low-profile design provides a multitude of installation options providing the right product to be used for the right mounting location.

- ✚ 6-Shooterz Accent Lights are the perfect size for tight spaces such as fenders, brake calipers, under triple-trees, inside horn covers and behind breathers, to name a few standard installation locations.
- ✚ 6-Shooterz are compact in size and incorporate six, ultra bright LED's. Our exclusive prismatic design provides a brilliant glow rather than spotting.
- ✚ When in motion the 6-Shooterz provide a "spinning" effect due to the layout and illumination sequencing.
- ✚ The Plug-N-Play interconnectivity between all Arsenal LED lighting products saves time on installation and provides for additional lighting to be easily added at anytime.
- ✚ Sealed components provide both water and heat resistance.
- ✚ Available in 4-Pin and 2-Pin Design:
 - ✚ 4-Pin 6-Shooterz are available in all 19 colors and color combinations and move in sequence with the 6" and 12" Stealth tubes.
 - ✚ 2-Pin 6-Shooterz are available in all solid colors and work independent of the Stealth tubes and 4-Pin 6-Shooterz, adding additional customization options.

6-SHOOTERZ MSRP: \$49.95 PR

Stealth Tube Color Options & Illumination Sequencing

Rumblings Pride offers the largest selection of colors and combinations in the industry. Our Stealth tubes are available in six (6) Tri-Color, six (6) Dual-Color and seven (7) Solid Colors offering endless possibilities to customize, personalize and individualize.

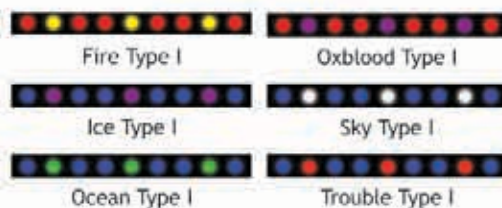

Stealth Tubes

Our Stealth tubes are available in two different sequencing rotations, Type I and Type II. Type I sequencing rotates with every third LED. Type II sequencing rotates in consecutive groups of three.

Dual-Colors

Solid-Colors

Illumination Sequencing

6-Shooterz Color Options & Illumination Sequencing

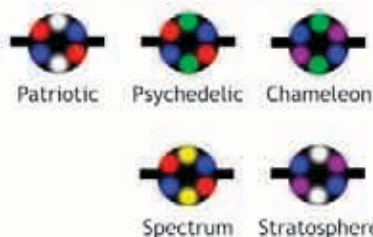

Our 4-Pin 6-Shooterz are available in six (6) Tri-Color, six (6) Dual-Color and seven (7) Solid Colors and 2-Pin 6-Shooterz are available all solid colors. Rumbling Pride offers the largest selection of colors and combinations in the industry providing endless possibilities to individualize and provide a unique custom look.

6-Shooterz

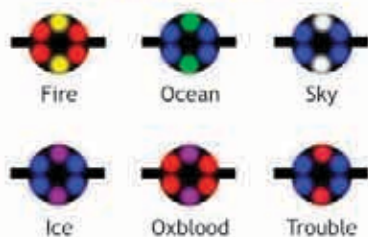

The 4-Pin 6-Shooterz move in coordination with the color rotation of our Stealth Type I and Type II tubes. When the Stealth tube is illuminating the "A" LED, the 6-Shooterz will also be illuminating the "A" LED. The 2-Pin 6-Shooterz illumination sequencing is controlled via the 12V auxiliary outputs on the Freedom III Controller.

Dimensions: .8" diameter" x .4" height (approx. the size and thickness of 4 stacked nickels)
