Ltd. Co.

Arsenal LED Lighting

Freedom Series Controllers

Rumbling Pride's Freedom Series Controllers are the core of the Arsenal LED Lighting System. All controllers provide 100% remote controlled functionality to an expanding list of Arsenal LED Lighting products. The ultra compact, all inclusive design that includes a pre-wired in-line fuse, allows easy installation of the controller near the battery. The only hard wired connection required is positive (+) and negative (-) to the battery, all other connections to the Arsenal LED Lighting system are "Plug-N-Play". It's that simple!

Taking customization to the next level, we offer two different state-of-the-art Freedom Series Controllers allowing you to control the sequence and speed of Rumbling Pride's Arsenal Lighting products as well as controlling the function of other manufacturers products.

Controller Installed Under the Seat Near the Battery

Freedom I Controller

Offers seven freeze modes, nine flash modes, a fade mode and one strobe mode with all motion functions controllable at five variable speeds.

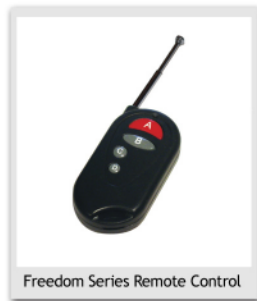

(For use with Rumbling Pride's 4-Pin Arsenal LED Products)

Freedom III Controller

Offers seven freeze modes, nine flash modes, a fade mode and one strobe mode with all motion functions controllable at five variable speeds. Also includes two remote controlled auxiliary 12-volt outputs offering on/off, with a flash mode controllable at five variable speeds, and a fade mode controlled at five variable speeds. (For use with Rumbling Pride's 2-Pin/4-Pin Arsenal LED Products as well as other aftermarket LED lighting.)

Remote Control

The compact remote controls the power on/off, flash, fade and freeze modes, as well as the segment rotation speeds of the Arsenal Lighting tubes and accent lighting. It has a retractable antenna, with an operational range of up to 65 yards, line of sight.

Freedom Series Remote Control

The Freedom III remote control incorporates an additional button to control the auxiliary 12V output feature of the Freedom III controller.

Controller Kit Includes:

- 1 - Freedom Controller
- 2 - Remote Controls
- 2 - Spare Fuses
- 2 - 12" Interconnect Cables
- 2 - 24" Interconnect Cables
- 1 - Roll of Connector Sealing Tape

- ✦ Remote Controlled
- ✦ Compact Design - (2³/₄"L x 2³/₈"W x 1¹¹/₁₆"D)
- ✦ Multiple LED Sequencing rotations and speeds
- ✦ Plug and Play Installation
- ✦ Pre-Wired In-line Fuse
