

# Rumbling Pride

Ltd. Co.

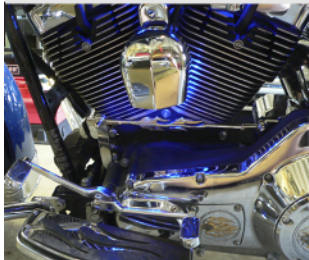

## Arsenal LED Lighting

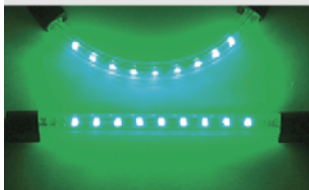

Installed securely and invisibly under the gas tank

Hidden tube under the triple tree lights up the front

6" Stealth tube fits perfectly behind the horn cover

Soft-flexible tubing matches the contours of the bike

12" Stealth tube installed under the rear fender

12" Tubes are the perfect fit for under tour packs

## Stealth 6" & 12" Tubes

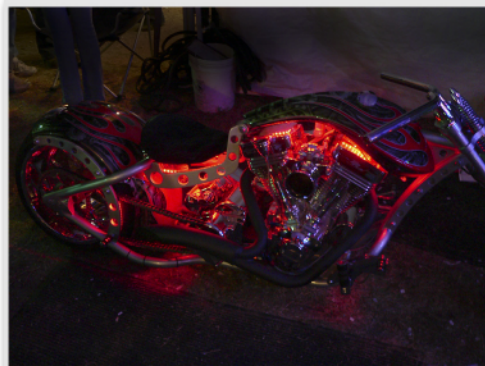

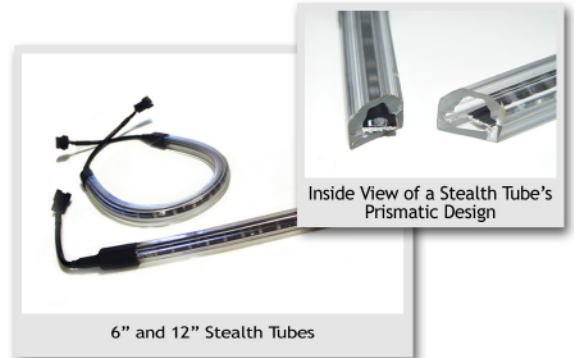

Rumbling Pride offers a complete line of "Plug-N-Play" LED lighting products. Our Stealth Tubes in 6" and 12" lengths are the foundation of our lighting system. When installed the tubes "disappear" providing an intense luminescent glow rather than "spotting" caused by pod style products. Designed not only to dispel the light from the LED's in a prismatic manner, the super-soft, flexible tubing allows the tube to match the contours of the bike offering multitudes of installation options.

### Stealth 6" Tubes

The size and flexibility of the 6" tube, designed with nine LED's per tube, fit perfectly under gas tanks, inside the horn covers, and behind air filter covers just to name a few standard mounting locations.

### Stealth 12" Tubes

With 18 LED's per tube, our 12" tubes are the perfect lighting solution for larger gas tanks, tour packs, and for ground effects mounted under saddle bags and frame rails.

- ✦ Super-Soft Flexible Tubes Match Contours of the Bike
- ✦ Slim Profile Design for Easy Concealment
- ✦ Prismatic Profile Eliminates Spotting
- ✦ Full Light Coverage
- ✦ Largest Selection of Colors and Color Combinations
- ✦ Sealed Tubing, Water and Heat Resistant
- ✦ Plug and Play Installation
- ✦ Ultra Bright LED's
