Fold-Down Bar Mount (FDBM) Installation Instructions

Parts Included in this Kit:

Parts included in this kit:

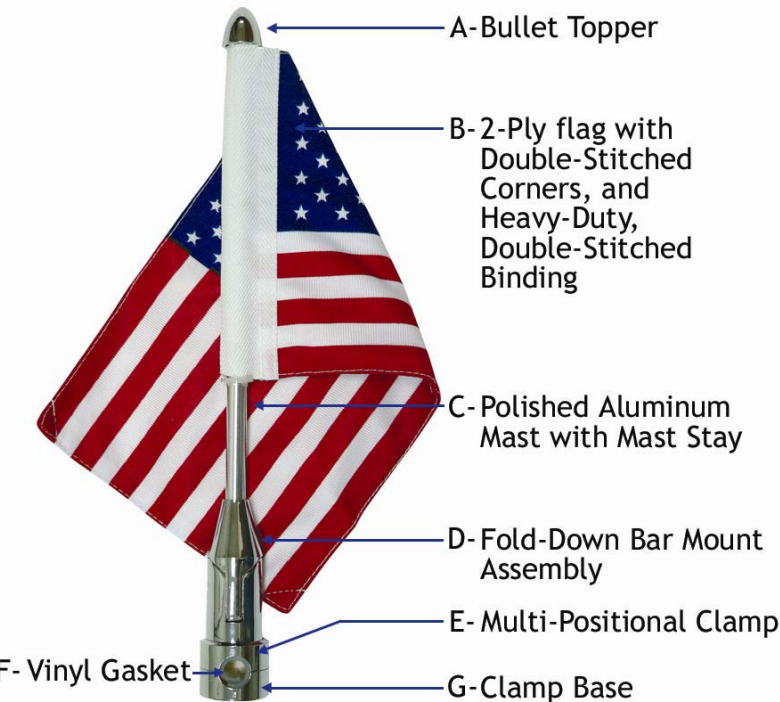

- A – Decorative Bullet Topper
 - B – 6" x 9" Flag
 - C – Aluminum Mast w/ Mast Stay
 - D – Fold-Down Bar Mount (FDBM) Assembly
 - E – Multi-Positional Clamp
 - F – Vinyl Gasket
 - G – Clamp Base
- 9/64" & 3/32" Allen Wrenches

*For ease of installation, parts A-B-C-D, come pre-assembled.

Step 1. Using the appropriate Allen wrench, remove the clamp base and vinyl gasket by loosening the two (2) screws found on the bottom of the clamp base.

Step 2. Select the preferred mounting location and place the vinyl gasket around the bar.

Step 3. Place the FDBM assembly with the multi-positional clamp on the vinyl gasket to ensure when mounted the flag pole folds down toward the front or sides of the motorcycle. To rotate the multi-positional clamp in 90 degree increments, use the second Allen wrench to remove the single screw which is located on the underside of clamp. After removing the screw, separate the clamp from the FDBM assembly and rotate to the desired position. Re-insert and tighten the screw holding the base in place.

Step 4. Insert the screws removed in step 1 into the clamp base, and position clamp on the bottom side of the bar. Tighten evenly. Note: Do not over tighten, excessive torque may damage the clamp or the chrome on the bar.

Step 5. Ensure the aluminum mast is mounted securely into the FDBM assembly. If the pole is not secure, remove pole and use Blue Loc-Tite® in the hole for the flag mast. Allow a minimum of 2 hours to cure.

Note: Periodically check the Fold-Down Bar Mounting system for any loosening. All fittings must be secure.

CAUTION: Do not lubricate, or get wax or polish on the inside of the FDBM assembly. It may affect the proper resistance that is necessary between the moving parts.
